

PBS Botulinum Toxin processing made simple

www.bntrx.com.au

Information for Patients

- 1 The medication you are receiving today (Botox, Dysport or Xeomin), like many pharmaceuticals, requires dispensing by a pharmacy.
- 2 This process is taken care of by the clinic and a pharmacy after treatment, resulting in an invoice being sent to you in the mail.
- 3 We're introducing a simpler, more convenient way to manage these pharmacy co-payments for the dispensed injectable.

This means no more forms for this treatment, just one-time registration.

Simply scan this QR Code with your phone and follow the prompts.

Please Note:

The co-payment cannot be taken without the completion of a prescription post-treatment.

If you need some help, the reverse-side of this sheet has instructions.
